

# Examining Discrimination and Health Care Access by Sexual Orientation in Minnesota

Figure 1. Unfair treatment from health care providers based on gender or sexual orientation in Minnesota

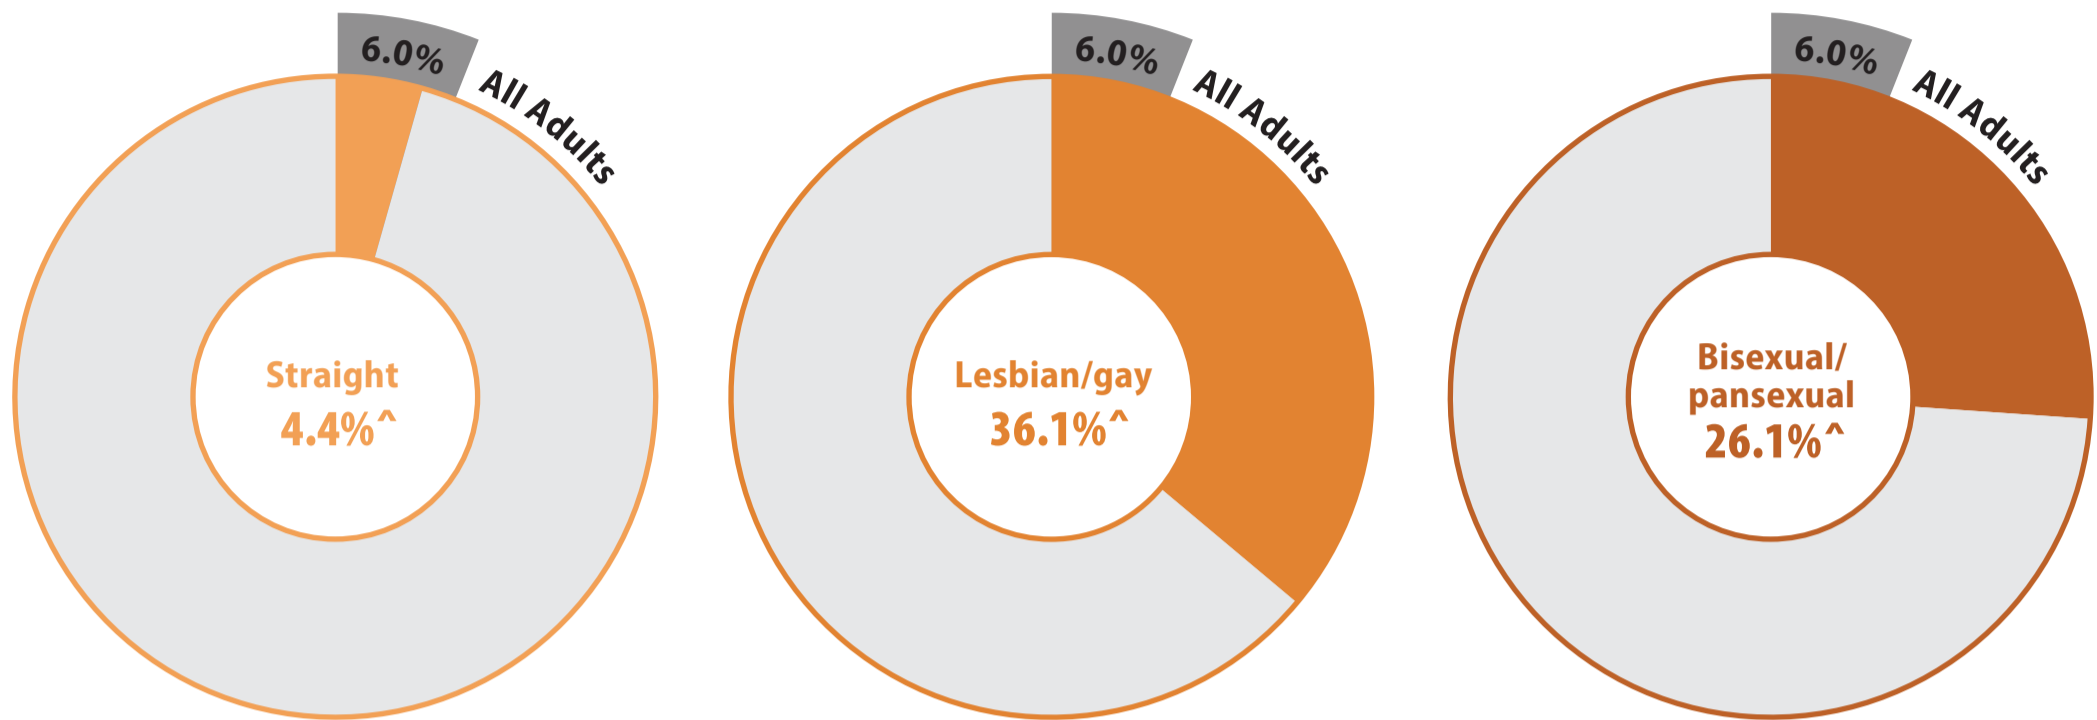

Figure 2. Health care access and barriers to care

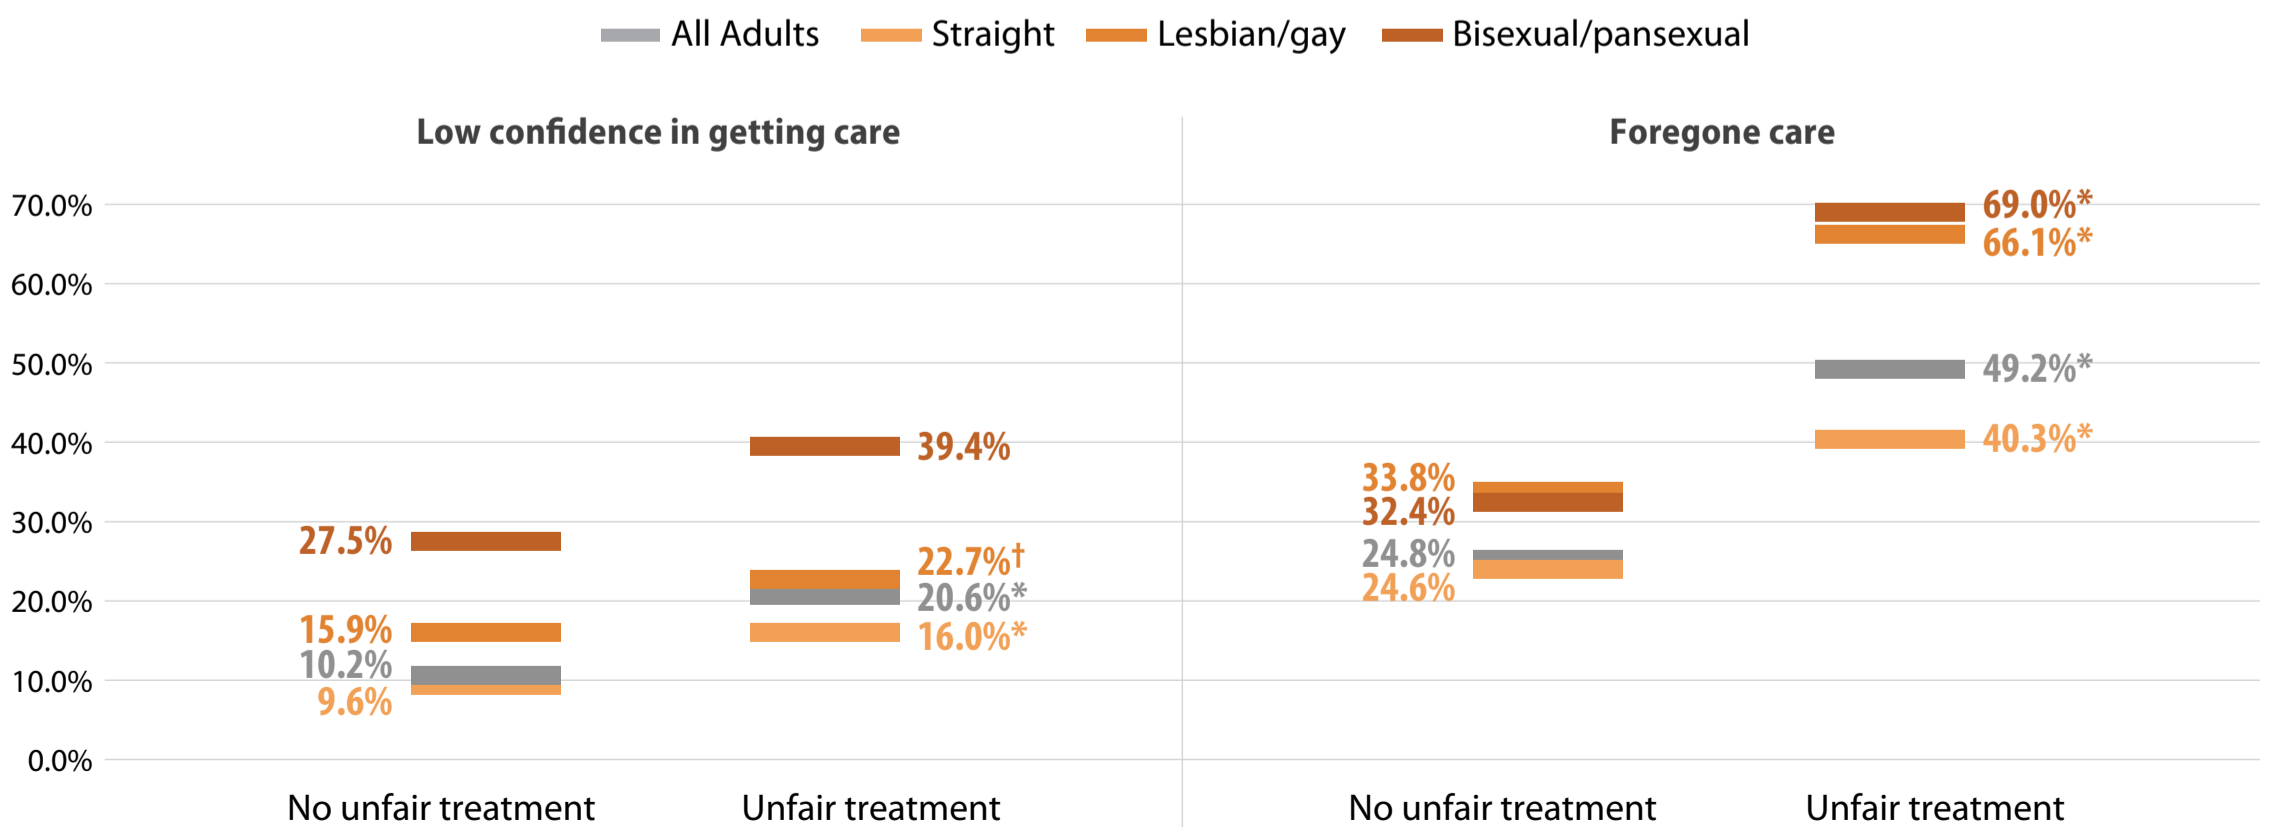

Figure 3. Experiences of gender-based discrimination associated with barriers to health care access

<sup>^</sup> Rate significantly different from All Adults at the 95% confidence level.

<sup>\*</sup> Significant difference within a given subpopulation between rates of people who experienced unfair treatment and those who did not.

<sup>†</sup> Estimate may be unreliable due to limited data (relative standard error greater than or equal to 30%).
