JSM, Seattle, WA

Background

The Affordable Care Act (ACA) has made significant changes in health insurance coverage and health care systems across the U.S.

States responsible for implementing many of the key elements

State program administrators and policymakers need reliable state-level data

National Health Interview Survey (NHIS)

Key data source for monitoring health, health insurance coverage, and health care access, use, and affordability in the U.S.

State identifiers are not available on public use files; access restricted to a Research Data Center

Maps & Charts

Step 1: Choose an Indicator by Topic or by Data Source?

Data Source: NHIS

Step 2: Select an indicator.

Access to Care

- Had Usual Source of Medical Care Other than Emergency Department in Past Year by Age
- No Trouble Finding Doctor in Past Year by Age
- Told that Provider Does Accept Insurance Type in Past Year by Age
